Founded by Louis and Greg Saig, the original store had about 20 stools and a very limited raw bar menu. "It was by chance that our first menu items were influenced by a couple of fellas from Louisiana. Their bold flavors and unique ingredients made a lasting impression on the development of the menu that you still see today."

Louis and partner Jesse Jabot along with an incredible corporate team, general managers, managers and staff at every level, strive toward always providing quality food and impeccable service, all at a great value. Harry's menu has come a long way from it's very humble beginnings in June 1987 as one of the original tenants of the Jacksonville Landing. This month's topic of interest: June 2017

Each month our staff takes a number of calls from people within the North Central Florida Community. We use our clients' comments to come up with ideas for the topics of interest. Here's a topic worth discussing.

Meldon Lawyers Continue to Expand Medical Knowledge

Jeffrey and Carey Meldon attended two important Legal-Medical Seminars during the month of May educating them regarding neck and head injuries suffered in serious crashes. The first seminar was held in New Orleans on May 4-5 and was sponsored by the American Association for Justice. The topics included Traumatic Brain Injuries, PTSD, how Neuroradiologists can help in disc herniation cases, and how to develop an effective life care plan for catastrophic injury cases. We also learned how to effectively cross exam insurance company doctors and how the internet can assist the attorney at trial.

Dr. Joel Franck presenting a Lecture

The second seminar was held in Grand Cayman on May 26-27 and the primary topic was how to use DMX (Digital Motion X-ray) results to assist your

clients in diagnosing serious injuries that are based primarily with the ligaments in the neck that are abnormally stretched out in a severe whiplash injury case. When a person is in a crash the forces to the neck can lead to intractable migraine headaches, TMJ, and debilitating neck pain. Dr. Joel Franck, a world famous neurosurgeon, described how instability at the C-1/C-2 levels of the cervical spine can cause the vertebrae to slide back and forth and actually cut off the normal supply of blood to the brain. He is the leading physician in the world regarding a procedure to fuse the C-1/C-2 vertebrae and eliminate the horrible symptoms caused by this injury. He performed that surgery on one of Meldon Law's clients that not only relieved her symptoms but lead to a policy limits 1.325 Million Dollar settlement.

There were as few fringe benefits associated with going to these important seminars since New Orleans was holding Jazz Fest 2017 and the Cayman Island trip included swimming with the stingrays, open water diving, and a fascinating nighttime Kayak tour to witness one of only 10 known places in the world where the water lights up (Bioluminescence).
